

## Plan Control All Shipments West Butter

Continued from Page One

effort, and the measure will enable the board to direct butter to areas of short supply.

All prices and quantities of representatives of the board in Canada are making reports on stocks, prices and butter requirements of their districts to make sure that butter is shipped to areas of scarcity.

Mr. Taggart said it was important that all those with butter should make them available immediately. While board policy respecting quotas in short supply sections, wholesalers must serve their regular customers on an equitable basis. In this instance will not contravene the policy of the board administrator's statement said.

**RATION BY WHOLESALE**

Some wholesalers were discussing rationing of butter to customers.

Mr. Taggart, "The ration administrator is doing the rationing. What we have to do is to make sure the available butter is distributed where it is needed."

Inquiries from retailers and wholesalers should be directed to the board's regional offices, Mr. Taggart said.

## French Pretender Is Now Living In North Africa

Algiers, Jan. 11.—(CP)—The French pretender, Charles de Gaulle, is now living in North Africa, according to a report from the French government.

De Gaulle, who fled from France in 1940, has been living in the United Kingdom since 1941. He is now believed to be in North Africa, where he is working to organize the French forces fighting against the Germans.

De Gaulle's presence in North Africa is seen as a significant development in the struggle for the liberation of France. He is believed to be working closely with the British and other Allied forces.

De Gaulle's move to North Africa is seen as a sign of his determination to continue the fight for the liberation of France. He is believed to be working to build up the French forces and to coordinate their actions with the Allied forces.

## Health Bill Is Believed on House Agenda

By C. R. BLACKBURN

OTTAWA, Jan. 11.—(CP)—A National Health Insurance bill is reported on good authority to be among the postwar social reform measures which are expected to feature the legislative program of the forthcoming session of parliament.

Such a measure has been the subject of numerous discussions during the past year and it will be studied further at a meeting in Ottawa this week, to be attended by physicians from many parts of the Dominion.

**MAINTAIN SECRECY**

The traditional secrecy which surrounds the Speech from the Throne is being maintained and it will not be known until Jan. 28 when the new session will be opened. The 1942 session of parliament adjourned last Aug. 1 until Jan. 27.

On that date it will be possible for the new session with the quiet ceremonial which the war has substituted for the traditional opening of parliament.

Health problems have been receiving special attention in Canada, and the government is planning to introduce a bill for the purpose of organizing a scheme by which medical hospital and nursing services will be made more readily available to the low income people.

What is being worked out has not been discussed publicly. Hon. J. Maclean, minister of pensions and medical services, said in a statement to the press that there had been numerous meetings during the past year.

He said that the government was planning to introduce a bill for the purpose of organizing a scheme by which medical hospital and nursing services will be made more readily available to the low income people.

**DISCUSS PRINCIPLES**

"We have been discussing the general principles of health insurance," said the minister, "but we have not finalized our plans yet. We will be meeting at this week's conference to ascertain what districts are suffering from lack of medical facilities and where such facilities exist above the minimum requirements, with the view of possible redistribution."

## Higher Prices Improbable For Wheat in 1943

Continued from Page One

Today that advisory committee will meet in Winnipeg late this week to give its recommendations for the next crop year.

**UNEXPECTED WORRY**

The advisory group's recommendations will be examined when the final draft of the wheat policy is considered by the federal cabinet. Some authorities said the 1942-43 crop year may be a disappointment in presentation to the House of Commons soon after its sitting recesses Jan. 27.

Ottawa sources said an unexpected worry had developed for the wheat board during recent months. Because of the heavy winter wheat harvest, the board has been expected to deliver quotas as soon as possible.

But this year a great many western farmers simply are not hauling in their wheat, and there is an estimated 700,000,000 bushels of unharvested wheat in western country elevators and about 20,000,000 bushels in the inland terminals, said one authority.

"It may be that some farmers have other sources of income because of the demand for livestock products and do not feel the need to deliver their wheat for ready cash."

It may be that road conditions have hindered deliveries in some districts, but actually the condition appears to be general.

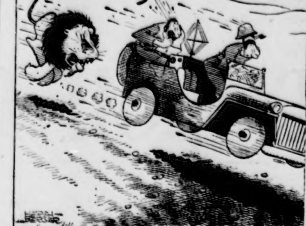

In a statement issued recently, the Wheat Board warned that unless grain is marketed to meet the relatively steady demand throughout the year it will not be possible to dispose of heavy deliveries made in the last two or three months of the crop year.

"Such deliveries will congest stage facilities and put to the test the 1943 crop and seriously affect delivery quotas during the early part of the next crop year," the statement said.

**100 Students To Lose Deferments**

TORONTO, Jan. 11.—(CP)—The academic records of 100 students at the University of Toronto have been considered unsatisfactory, and these students will lose military deferments granted them at the beginning of the school year, Registrar A. B. Fennell disclosed today.

"Hello, headquarters? How much gas does the tank of this jeep hold?"

## F.D.R. Plans '100 Billions' War Spending

Continued from Page One

The warrent of the \$100,000,000,000 is as follows: Munitions of all sorts, including military supplies, \$60,000,000,000; an increase of \$800,000,000 over this year; military and civilian pay, subsistence and travel, \$20,000,000,000; an increase of \$800,000,000 over this year; industrial construction, \$20,000,000,000; a reduction of \$400,000,000, indicating clearly how the United States has passed the preliminary stage in wartime production, other military construction, mostly camps and training centers, \$300,000,000; a reduction of \$1,000,000,000; other wartime expenditures, including research and development, \$10,000,000,000; an increase of \$1,000,000,000.

The budget is based on a strength of 7,200,000 men for the army and a total of 9,700,000 men for all the armed services of the United States at the end of this year, the president said. He admitted that the amount of \$100,000,000,000 for war purposes did not include all recommendations of the army and navy but "it is all we think it is feasible to spend," and takes into consideration the outside physical limits of the war effort.

As tools, labor and raw materials, the president said, "the budget is a statement of the president's clear intention of winning the war."

In his budget message, the president clearly indicated the danger of inflation in the United States, unless controls and restrictions are applied and extended to the war effort.

He did not enumerate, however, the \$100,000,000,000 in new taxes, should be required, but stressed the advantages of a system of forced savings, the advantages of a rationing system, and the advantages of a system of wage and investment controls.

## 11 Attacked in 9 Hours Two U-Boats Sunk, Many Damaged As Liberators Blast "Wolf Pack"

By ALLEN R. NELSON WITH THE R.A.F. SOMEWHERE IN ENGLAND, Jan. 11.—(CP)—Spectacular air attacks on a powerful enemy submarine pack massing to strike at an important convoy in the Atlantic were mounted last night by two Liberators, one of which was disclosed yesterday with news that the pack had been dispersed. One of the Liberators carried two R.C.A.F. members in its crew.

The aircraft, guiding a convoy from the United States which reached Britain without serious loss, sighted 12 U-boats in less than nine hours and attacked 11 of them. Two were almost certainly sunk and others damaged.

The two undersea craft believed almost certainly sunk were attacked by an aircraft in which FO. Michael Layton of Montreal was navigator and PO. R. Thomson of Fort Hawkbury, N.S., was another crew member. Layton, it was announced yesterday, has been made a member of the Distinguished Service Order.

**ACE SUB STALKER**

This Liberators, piloted by Sqn. Ldr. Terence Bulloch, the R.A.F.'s U-boat stalker, sighted eight submarines and attacked seven. The first attack was so accurate the submarine apparently burst open under water. Masses of debris in which were bodies floated to the surface.

"We dove on the sub and opened up with our own machine guns," Bulloch related. "We could not do anything else but the sub did not know that."

Three hours later the same Liberators sighted two submarines 300 miles apart "going like mad" for the surface. It attacked one a couple of hours later a terrific water spout shot into the air.

"We dove on the sub and opened up with our own machine guns," Bulloch related. "We could not do anything else but the sub did not know that."

Twenty minutes later another sub was sighted and, to quote Layton: "The crew began to wonder if the entire German submarine fleet was congregated in that part of the Atlantic."

Bulloch, also named to the D.S.O. for his part in the Battle of the Atlantic, said a U-boat surfaced 11 miles from the convoy and that "it sighted us and started to crash-dive, but we got it just as it was disappearing and death charges went down on top of it."

Taking up the story, Layton said he jumped back from the stricken after the attack "and saw about 40 feet of the submarine sticking out of the water at an angle of about 30 degrees."

"The death charges exploded right along the track of the U-boat and the sub did not know that," he added.

**HUGE OIL PATCH**

A patch of oil 500 yards long spread over the surface and was followed a few seconds later by debris. A Corvette rushed to the scene and signalled the Liberators "you certainly got him."

## French General Gets Prison Term

LONDON, Jan. 11.—(CP)—The Vichy radio said Saturday that Maj.-Gen. de Latre Tassigny, charged with trying to oppose the Germans when they completed their occupation of France last November, has been sentenced to 10 years imprisonment by a special court.

Gen. Tassigny, who was in command of the Montpelier district, was reported at the time of the German occupation to have led his men in a short and abortive revolt. He was at one time in command of French forces in Tunisia.

**3rd Registration 'Imaginary' Says Ottawa Official**

OTTAWA, Jan. 11.—(CP)—Selection Service Director Arthur MacNamara last night described as a figment of someone's imagination a report carried by a Vancouver newspaper Saturday stating that a third national registration would be made in February.

The report said that the registration would be made through employees to ascertain "how many employees were on Canada's payroll at the start of the year, what jobs they have been doing and what they are capable of doing."

A native of England, Layton has lived in Canada since 1924. His mother resides at Vancouver. His sister, Elizabeth, is one of Prime Minister Churchill's private secretaries.

Vermont's first marble quarry was opened in Dorset in 1785.

**Sign Agreement**

LONDON, Ont. Jan. 11.—(CP)—General Steel Waters Limited and United Steel Workers of America (C.I.O.) have signed agreements covering employees in two plants where union officials announced last night.

# Universities Will Curtail Arts Courses

Continued from Page One

Aberdeen, Jan. 11.—(CP)—The student population at the University of Aberdeen, Scotland, will be reduced by 10 per cent in the next year, according to a statement issued by the university authorities.

The statement said that the university authorities had decided to curtail arts courses in order to meet the requirements of the armed forces and the industrial war effort.

The statement also said that the university authorities had decided to increase the number of students in the sciences and engineering courses.

The statement said that the university authorities had decided to increase the number of students in the sciences and engineering courses.

# Canadian Ace, 9 Other Fliers Die in Crashes

HALIFAX, Jan. 11.—(CP)—Five men, including Sqn. Ldr. N. E. Smith, died in the crash of a twin-engine aircraft in Newfoundland. Two survivors of the crash, a pilot and a co-pilot, were killed in the crash of a single-engine aircraft in Newfoundland. The crash of the twin-engine aircraft occurred on Jan. 10, 1943, near St. John's, Newfoundland. The aircraft was a C-47, and it was carrying nine people. The aircraft crashed into the ocean, and all nine people died. The crash of the single-engine aircraft occurred on Jan. 11, 1943, near St. John's, Newfoundland. The aircraft was a C-47, and it was carrying five people. The aircraft crashed into the ocean, and all five people died.

## Luscar Defeats Cadomin Midgets

car Midget hockey team defeated the Cadomin Midgets for the second straight time this season at the local arena by a score of 7-4.

Bodinechuk opened the scoring for the visitors while E. Thomas tied the game up a few seconds later when he scored on a pass from C. Thomas. C. Thomas later put the home team in the lead with a second goal.

Lusard did all the scoring in the second period, when C. Thomas lead the attack with three goals.

D. Onychuk ended the scoring on a pass from E. Thomas. Leo Luchini scored twice for Cadomin, the first on a pass from C. Cebullak. Jackie Nicolson on a pass from Stene ended the scoring.

## In Historic, Legendary Region

## Caucasus Presents Rich Prize for Soviets to Regain

She loves, she purrs—but she scratches. Why not? Simone Simone is the daughter of a "panther woman," prowling in darkness, making night hideous with hissing and stalking in RKO Radio's "Cat People."

With great gains being made on all fronts by the Red Army, hopes of the Russians and their Allies everywhere are that the rich Caucasus will be completely regained from the Nazis. The complex Caucasus is a historic, legendary region known for its fierce mountain tribesmen, its mineral riches and—most of all—its oil. In the 16 pint-sized Caucasus republics—all part of Soviet Union—there is a confusing variety of races, languages, customs and costume.

The lazy little fellow astride his pal's back has had most of Auckland, N.Z., in stitches because he even dines on his favorite perch so that his fellow opossums cannot snatch his dinner.

## She Nabs Her "Prince"

Olivia de Havilland and Robert Cummings, stars of Warner's uproarious comedy, "Princess O'Rourke." Others prominent in the cast are Jack Carson and Jane Wyman and the story and the direction are by Norman Krasna.

## Barbarian—Behind Bars

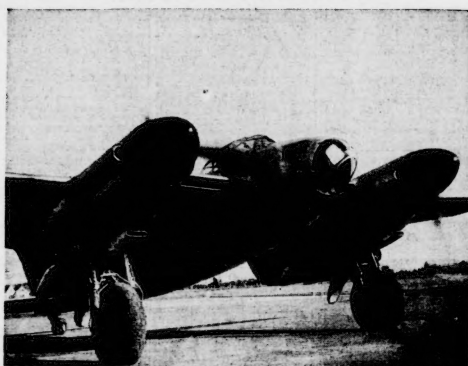

British Tommy, in North African desert town, is justified in pausing to gloat over fate of Hitler's picture.

## Bowl Beauty

Not war relief, but relief from war pictures is provided by this shot of Eileen Knapp, Florida beauty who has been named Orange Bowl Queen.

## New Aircraft Produced in Canada

The design of the "Mosquito" was inspired by Captain DeHavilland, father of Geoffrey DeHavilland, well-known British pilot and one of the heads of the famed English aircraft firm of the same name. The plane is being produced in Canada by DeHavilland Aircraft of Canada, Ltd., Toronto.

Wingspan	54'2"
Length	40'0"
Height	15'3"
Engines	2 Rolls-Royce Packard
Aircrew	DeHavilland three-bladed hydromatic type.
Armament	May consist of four 20-mm. cannons, and four .303" machine guns.
Construction	Almost entirely of wood.

Recognized as the world's fastest and most efficient plane, the DeHavilland "Mosquito" bomber has an exceptionally long range, is extremely manoeuvrable, and can be utilized on day or night operations. It can also serve as a reconnaissance craft to great advantage because of its remarkable speed. The photograph shows the first Mosquito built in Canada.

## Distinguished Wedding Guest

President Roosevelt, who took time off from state duties to journey 15 miles to Fairfax, Va., for the wedding of Mr. and Mrs. John Gorham Palfrey, Jr., is shown as he congratulated the couple after the ceremony. The bride is the former Bella Wyatt Roosevelt, daughter of Maj. Kermit Roosevelt and granddaughter of the late President Theodore Roosevelt. Bridegroom, a Bostonian, is to report to the Enlisted Reserve Corps.

## Pass the Ammunition—In New Guinea

That striped "bunting" draped over the trees at left of this picture means bad news for the Japs. The "ribbons" are cartridge belts and the soldiers are toting the ammunition to the front through the New Guinea jungle, just before the campaign which ended in the capture of Buna.

## Miss January

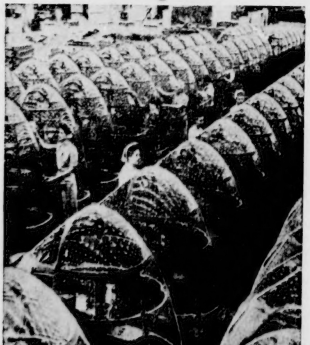

Lois January of New York appropriately and prettily poses beside the date that is No. 1 on our 1943 calendars.

## Fair and Square Ride Sharing

Hollywood's Marguerite Chapman puts double purpose in her patriotism by sharing rides and collecting fares to be donated to the Red Cross.

## Shooting Stars

Flaming bullets for Berlin and Tokyo will soon replace the starlike reflection of factory lights patterned in these plexiglass news of American Douglas fighting planes.

# SO YOUR HUSBAND'S GONE TO WAR!

by ETHEL GORHAM whose husband is at war

## CHAPTER EIGHT

Where's Daddy, Mummy?

WANTED some good meaningful words. Words that will explain without horror, without blood and thunder, without fear, this thing that is happening to your child.

Daddy is gone. It's as obvious as your child's nose on his face. It's something he knows. You can't back it up. You can't answer the questions. No matter how anxious you want for every child to know physical safety, how you wish him out of danger zones when the time comes, how you shift and budget and plan a way to keep him as happy and carefree as in the past, unless bombs threaten your own home, your first concern is with the way your child feels, your first thought the questions must answer.

What can you do to lessen the nervous strain? How can you fill the gap in your household so you alone feel it? How often a woman mother go about finding sense in theories and words and psychologists' formulae? How does she learn to differentiate between a child's imagination and a literal truth?

When my little girl comes running into my bedroom at night, saying she dreamed of the horror of dropping bombs and boyegmen

enemies come to capture her, I don't know whether it's true or whether it's just a wonderful excuse to climb into bed with me. When she tells me she is "melancholy" and I ask her "Why?" I don't know whether she started the whole thing because "Why?" I don't sound of the big word "melancholy" or because she really feels lonely and sad without her father.

I look her to the airport with me the day we saw her father off. I wanted her to see him get off the

beasties, even if you know it was thought up that moment. Far better to be taken in a few times than to turn the child away from you some moment when she may need you most.

The best thing you have to offer your children is your own calmness, your own serenity. All the experiences that have come out of England's years of war show that as you stand up and take it, so will your children.

Because you are alone now you have to supply all the courage and family unity that used to be in part your husband's job. But don't clutch at your children. You will find yourself turning to them as safe guards for your own emotional security. You must not let them have them to compensate for your new loneliness you will want to have an attention and companionship out of keeping with the real needs of either of you.

You can sometimes give your children a greater feeling of security when you are removed from them. There are no hard-and-fast rules about the outward forms of security. You may achieve it by keeping your children close to you, or you may bolster their morale by sending them away to school where surrounded by other children, they will not be witness to your own private emotional struggles and adult fear.

One of the bravest, most devoted mothers I have ever met sent her two boys off to a private boarding school because she didn't want them to see her drained of energy after a hard day on a newly acquired job. Almost all her money goes into their schooling, and she lives in a tiny furnished room in an evil part of town on the little she has left.

It is from your psychological stamina, no matter how you have to set up your household, that your children will draw strength. Your youngsters see that you are anxious and their own anxiety will know no bounds.

With no man around to insist on calm, you have to do both the mother's and father's job of fortifying the children against panic. You must be twice as stable and well-balanced as you might normally be.

Men have a facility to make things to their nerves. You have to learn how to conquer your own feminine weakness and substitute the male type of bravery.

If the very way your child plays hopscotch changes before your eyes, remember that cops and robbers turned into Xaiks and Huns in our early years, and that our childhood thirst for blood made us no less peace conscious during the long armistice. As a matter of fact, eminent government investigators have claimed our generation was "too peaceful," so it would seem that bellicose play need not necessarily have a warlike effect.

Even the younger children have changed their romping. The little boy who is the natural leader in his neighborhood neighborhood has decreed that henceforth all blocks be used to build airplanes instead of mere trifling castles.

One of the most important things we want out of this war is that our children have a better chance at peace. They will never have it, no matter how the war turns out, if they miss the fun and security and little backlogs of their childhood. Spontaneous, hearty, unvarnished fun comes out of being able to make the most of what is going on around you. If part of the fun for your children consists in making believe they're parachute troops or sentries set to watch fat little five-year-old spies, or see pilots, don't confuse them by abolishing and conglomeration.

Fortunately they do not know, and we hope will never know, what parachute troops can mean to a city or what hidden danger there can be in spies and sabotage. As long as parachutes are a means of descending from piles of building blocks, spies are other children who try to enter the park, your child's world is safe. It is as simple as all that, and there is little use in stressing because your child prefers to play with a toy cannon instead of a bubble pipe.

Children don't become hardened to bloodshed and disease by play because they play at war. For the smaller ones it is just a means of translating into harmless playing on around them. For an older one it becomes an expression of adventure and courage.

(To Be Continued)

## No Traces Found Of Missing Plane

KETCHIKAN, Alaska, Jan. 11.—(AP)—A coast guard and co-operating Royal Canadian Air Force officers have had no success in their search for the Morrison-Knudsen company plane missing since last Tuesday, coast guard headquarters reported yesterday.

A number of leads as to the whereabouts of the plane, piloted by Harold Gillan, veteran Alaska flier, have been checked but have proved false, the report said.

## Queen's Fund

MONTREAL, Jan. 11.—(AP)—National total of the Queen's Canadian Fund for Air Raid Victims was announced last night as \$12,718,579. The fund, which was started in 1940, has raised \$25,280,810 a week ago.

### Returning to Plant

WINDSOR, Ont. Jan. 11.—(CP)—Approximately 1,500 workers who left their jobs at the Chrysler Corporation of Canada will return to work on their regular Monday shifts, officials of the United Automobile Workers of America (UAW) announced last night.

The huge plant—housing the main assembly line for military vehicles—was closed for about three hours Saturday when the men left their machines after lunch-hour in protest, union officials said, against dismissal of a senior employee.

## Beef Cattle Sales

### Reveal Sharp Drop

OTTAWA, Jan. 11.—(CP)—Beef supply difficulties were demonstrated today in agriculture department statistics showing beef cattle at stock yards and shipments to packing plants in the week ending Jan. 7, were less than half the total for the same period last year.

Last year, sales and shipments totalled 11,467 head against 11,813 this year. The statistics was made public in Ottawa, Canada.
